

Chiropractic Care: A Low Cost Solution to High Cost Healthcare

Numerous studies have shown that chiropractic treatment is cost effective and safe. The following are excerpts from several studies. By examining the research which demonstrates the cost savings associated with chiropractic care, you will find that chiropractic offers tremendous potential in meeting today's health care challenges.

- ✓ Spinal Manipulation would be "a cost-effective addition to 'best care' for back pain in general practice."¹
- ✓ "For patients who do not improve with self care options, clinicians should consider the addition of **nonpharmacologic therapy with proven benefits**—for **acute low** back pain, **spinal manipulation**."²
- ✓ "Chiropractic care significantly reduces per beneficiary costs to the Medicare program. The results of the study suggest that chiropractic services could play a role in reducing costs Medicare reform and/or a new prescription drug benefit."³
- ✓ "PCPs utilizing an integrative medical approach emphasizing a variety of complementary and alternative therapies had substantially improved clinical outcomes and cost offsets compared with PCPs utilizing conventional medicine alone."⁴
- ✓ Spinal manipulative treatment for both chronic and acute lower back pain was more effective and provided more short-term relief than many other types of care, including prescription drugs, physical therapy and home exercise⁵
