

"Thanks for the help. I am working to absorb more and more of the web-site and all the programs and practice enhancing tools. My numbers are up and I am currently busier with more consistency. I think when we make positive decisions about our professional direction and business acumen, then we start to progress out of the stagnancy and mire of poor practice habits. But, then I start to pat myself on the back and say, "Look, what a great doctor I am!" and fail to realize that I have the help and caring of a great mentor. Thanks for keeping my feet to the fire!"
